Dispers pigment preparations for high pressures laminates (HPL)

Developed for both interior and exterior applications

Dispers pigment preparations for HPL

Dispers are waterborne liquid preparations based on organic and inorganic pigments well stabilized with an optimized blend

Key benefits

- Very good penetration to the paper
- Better heat stability up to 240 °C than dyes
- Better light fastness than dyes
- High color strength

Dispers product portfolio for high pressure laminates (HPL)

Key benefits

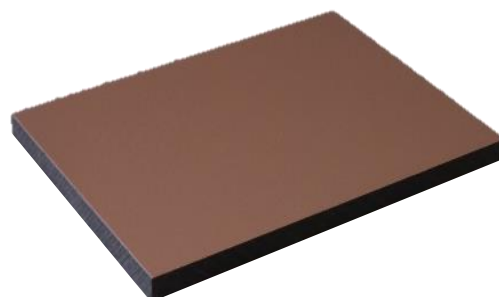

High pressure laminates (HPL) could be used in various interior and exterior applications: furniture, interior fittings, walls, furnishings, company logos, design elements, signs, billboards, street maps, building plans, exhibition plaques, doors, partitions, shop fittings, tabletops, etc.

Dispers pigment preparations for HPL applications

Trade name	C.I.	Pigment content (~%)	Recommended dosage rate [~%]
Dispers Black 0079	mixture	49	1.5

Key benefits of Dispers Black 0079

- Homogenous coloration also on the cut surface
- Color stays unchanged at press surface during pressing process
- Does not get destroyed on surface and cut surface
- Can be used for interior and exterior
- Three times stronger than competitive dyes

Our Dispers Black 0079 was especially developed for interior and exterior applications to reach a unique, highly-decorative black tone
