

Emgard® HP 75W-90 – The high-performance axle oil

In the lubricants market, customers increasingly focus on the sustainability and efficiency of the products they buy. With Emgard® HP 75W-90, BTC is now offering the further developed and improved product from the proven BASF Emgard® line. This special axle oil is a synthetic lubricant that scores well in terms of sustainability and performs particularly well at demanding temperature conditions.

Long replacement intervals, less waste oil

Emgard® HP 75W-90 is characterised by its particularly long service life and thus enables increased replacement intervals – leading to reduced maintenance costs and lower amounts of waste oil. “Low environmental impact and low cost burdens are two topics that are very important to BTC and which our customers clearly demand, too,” says Gabriele Möller, Head of Business Management Europe for Fuel & Lubricant Solutions at BTC. As a synthetic lubricant, Emgard® HP 75W-90 also has a high proportion of specially selected additives.

Suitable for heavy duty use and extreme temperatures

The axle oil performs well at cold and very hot temperatures and is suitable for use in many areas – for example in heavy goods vehicles or agricultural machines, trams and high-speed trains. Emgard® HP 75W-90 is highly effective in protecting axles, transmissions, gears and bearings against wear and corrosion.

Additional Information

Emgard® HP 75W-90 is officially approved by numerous manufacturers, including

- API GL-5 / MT-1
- SAE J2360
- Meritor O76-Q
- Volvo Transmission Oil 97312
- Scania STO 1:0
- MAN 342 Type M2
- DAF Trucks
- Meritor Europe – Extended Drain

Our Expert

Gabriele Möller has been working in the chemicals industry for 35 years, during which time she has gathered experience in every central field, from purchasing to HR and sales. Personal experience makes her familiar with customers' needs and points of view: before joining BTC, Möller spent many years working for a retailer who was a BASF customer. Möller has officially been in the Fuel & Lubricant Solutions division for ten years, but it has actually been much longer. "I have always been very mobile," she says. She was one of the first young women of her generation to ride a motorcycle. Möller enjoys managing products that are easy for laypeople to understand, from coolants to brake fluids. At BTC, she is responsible for the entire strategic segment involving Fuel & Lubricant Solutions.
