Formulating with alternatives

Looking for alternative ingredients for your formulation to avoid issues currently discussed in our industry e.g. silicones, microplastics, paraffins, and others?

BTC provides solutions e.g. with:

- [Dehyquart® Guar](#) types for hair conditioning
- Very light, high spreading and volatile [emollients](#)
- Efficient [emulsifiers](#) with favorable sensory profiles
- [Rheocare® XGN](#), a new Xanthan Gum for thickening and stabilization

Please ask us for more details, information or samples

You can find additional information about “Formulating with alternatives” and contact your local BTC partner directly using the [Solution Finder](#).
