## A new Hydrotrope that enables high performing cleaner formulations - Glucopon® 100 DK

### Do you have one of the following challenges?

- Your hydrotrope foams too much
- You want to formulate for EU Ecolabel
- You need to reduce the VOC content of your formulation
- You have issues with the processability of your hydrotrope
- You need a GHS label free hydrotrope
- Your hydrotrope doesn't work in highly alkaline solutions
- Your hydrotrope is not compatible with plastics
- Your hydrotrope doesn't allow you the high concentration you need

### Then it might be worthwhile to test Glucopon® 100 DK in your formulation!

You can find additional information about Glucopon® 100 DK and contact your local BTC partner directly using the [Solution Finder](#).
