HALAL CERTIFICATION

BASF now offers 145 ingredients for personal and home care products which have been certified to the international halal standard HAS 23000.

The portfolio of halal ingredients ranges from sugar-based surfactants, pearlizers, emollients and protein derivatives for personal care applications to detergent and cleaning agents, and raw materials for the pharmaceutical industry.

Along the entire value chain, strict guidelines for manufacturing, filling, warehousing, and transport are followed to ensure product purity in compliance with Islamic law. In order to gain the halal certification for its products, Illertissen and BASF's largest production site for cosmetic ingredients, Düsseldorf, successfully underwent four audits.

You can find additional information about Insight Halal Certification and contact your local BTC partner directly using the [Solution Finder](#).
