Luxurious Crystals for premium skin care products

Premium skin care products are a fast-growing market in Personal Care. BASF's Care Creations™ introduces "Luxurious Crystals", a New Translucency Technology that enables formulators to design skin care leave-on products with a prestige translucent appearance and sophisticated sensory without using silicones. By combining properties of hydrogels and customary oil-in-water emulsions "Luxurious Crystals" provides a wide range of translucent to translucent-milky appearances in formulations and a sensory experience ranging from luxurious-powdery to elegant and silky.

Discover the possibilities "Luxurious Crystals" can give you:

- Aqua Serene Delicate Translucent Emulsion
- Caressible Crystals Soft Translucent-to-Creamy Emulsion
- Crystalline Droplets Cooling Translucent Emulsion
- Melting Diamonds Crystalline Translucent Emulsion
- Silky Delight Rich Translucent-to-Creamy Emulsion

You can find additional information about Luxurious Crystals and contact your local BTC partner directly using our website for your [industry](#).
