Solutions for Monodoses

Combining enzymes with our broad portfolio to enable the next level of low temperature washing

- Ingredients for low temperature washing achieve the same washing performance with energy savings
- Primary Detergency provides the best cleaning results for difficult stains
- Rheology Modification improves the consumers' perception of quality

Do you need to develop new liquid monodose formulations?

- Do you want to improve **stain removal performance**? → **Lavergy™ Pro 104 L and Sokalan® HP 20** together form the best solution to remove a broad set of difficult stains, including blood, milk, ink, and chocolate
- Do you want to add a low **temperature claim**? → The synergy between our broad portfolio and enzymes enables the next level of washing at temperatures as low as **20°C**
- Do you need to improve **product perception**? → **Rheovis® AT 120** contributes to consumer perception of high quality by enabling transparent finished monodoses with high viscosity

We will help you to reach your targets!

You can find additional information about Solutions for Monodoses and contact your local BTC partner directly using our website for [your industry](#).
