## Texapon® SFA and Dehyton® SFA

### **Innovative, naturally derived, very mild surfactants**

Texapon® SFA is extremely gentle on the skin and eyes, making it especially suitable for delicate baby skin and formulas for tear-free shampoo products. A real conditioning booster; it enhances the performance of cationic polymers in shampoos. It creates an extremely porous, stable and creamy foam ideal for body wash and other versatile personal care applications.

Dehyton® SFA is an innovative blend of Texapon® SFA and betaine. It is cold processable and easier to formulate.

You can find additional information about Texapon® SFA and Dehyton® SFA and contact your local BTC partner directly using our website for your [industry](#).
