

Plantapon[®] WW 1000

The perfect surfactant compound for clear non-aqueous shower and baths oils

Finding the right surfactant system for clear non-aqueous shower and bath oils can be difficult. The trend towards higher oil levels, the use of more natural oils and different oil combinations, creates a real challenge for the solubilizing capacity of surfactant systems.

We are now proud to offer our new compound **Plantapon[®] WW 1000** specially developed to achieve excellent performance.

Performance Profile

- Excellent solubilization of natural oils even at high oil concentrations
- Clearly soluble in non-aqueous oil formulations (with oils of almost any polarity)
- Good foaming performance even in the presence of high oil content
- Robust water-free shower and bath oils
- Cold processable

Please ask us for more details and formulation examples.
