

BTC to supply pharmaceutical manufacturers in the Nordic countries from 2014

From 2014, pharmaceutical manufacturers in Sweden, Finland, Norway and the Baltic countries will be able to obtain BASF SE pharmaceutical products through BTC Europe GmbH. They will also receive technical and other services.

Expansion of the business area

From January 1, 2014, pharmaceutical products from BASF SE, the world's largest chemical company, will also be available through BTC Europe GmbH in Sweden, Finland, Norway and the Baltic countries. Pharmaceutical manufacturers from these countries will receive technical and other services from BTC, in addition to products such as the tablet bonding agent *Kollidon®* and the tablet coating material *Kollicoat®*. Among the services provided are technical literature, advice on specific applications and general support.

Customer Support

Fokke Andreesen is responsible for Customer Support and Sales in the Nordic and Baltic countries at BTC. He provides new customers with all the information they need and offers initial consulting services. Later, customers can submit their orders via a specially-developed in-house sales function or through BTC's convenient Online Shop.

Of course, Fokke Andreesen and his colleagues in Customer Support are also available to answer any questions or special customer requests. ([fokke.andreesen](mailto:fokke.andreesen@btc-europe.com) at btc-europe.com, Phone: +49-2234-2005283)

We are developing all the time and would love you to be a part of this. You will receive the next news from the world of special chemicals with the next Expertise Plus Newsletter.
